► SUMMARY

I'm a Computer Science graduate with a passion for web development, proficient in HTML, CSS, JavaScript, React.js, MySQL, and Bootstrap. I have also completed a Full-Stack Python Development course, gaining expertise in Python, Django and database management. Eager to contribute to innovative teams and tackle real-world challenges with scalable and efficient solutions.

► PROJECTS

E-Commerce (Fruits shop) :

- Overview : To build a small e-commerce application for a fruit shop, leveraging React for the frontend and API calls to fetch, manage, and display fruit data dynamically.
- Tools: React , API.

Event-Mangement :

- Overview : To design and develop a simple web-based platform that allows users to browse details about upcoming music events, register for events, and view their registered events.
- Tools : HTML, CSS, JS

Portfolio :

- Overview : Create a personal portfolio website to showcase my skills, projects, and achievements. This interactive website will allow potential employers, clients, or collaborators to learn about me, view my work, and contact .
- Tools : HTML, CSS, JS

Car management :

- Overview : A **SQL Multi-Store Car Management System** is a database-driven solution designed to manage multiple car dealerships or rental stores efficiently. It handles **inventory management, sales tracking, customer records, employee management, and service history** across multiple locations. The system uses **SQL databases (PostgreSQL)** to ensure secure data storage, quick retrieval, and seamless transactions.

Online Image Download :

- Overview : Build a web application where users can search and browse high-quality images using the Unsplash API. The app allows users to download images directly to their devices.
- Tools : Unplash API, React

► DECLARATION

I affirm that all the details provided above are accurate and true to the best of my knowledge. I accept full responsibility for the correctness and authenticity of the mentioned information.
